Exp No:13.a. Conduct an experiment to show data visualization using line plot

Code:

```
import matplotlib.pyplot as cricket

 Overs=list(range(5,51,5))
Indian_Score=[30,55,90,129,165,200,239,270,310,350]
Srilankan_Score=[25,70,90,120,140,170,195,220,255,279]
cricket.plot(Overs,Indian_Score)

cricket.plot(Overs,Srilankan_Score)

cricket.show()

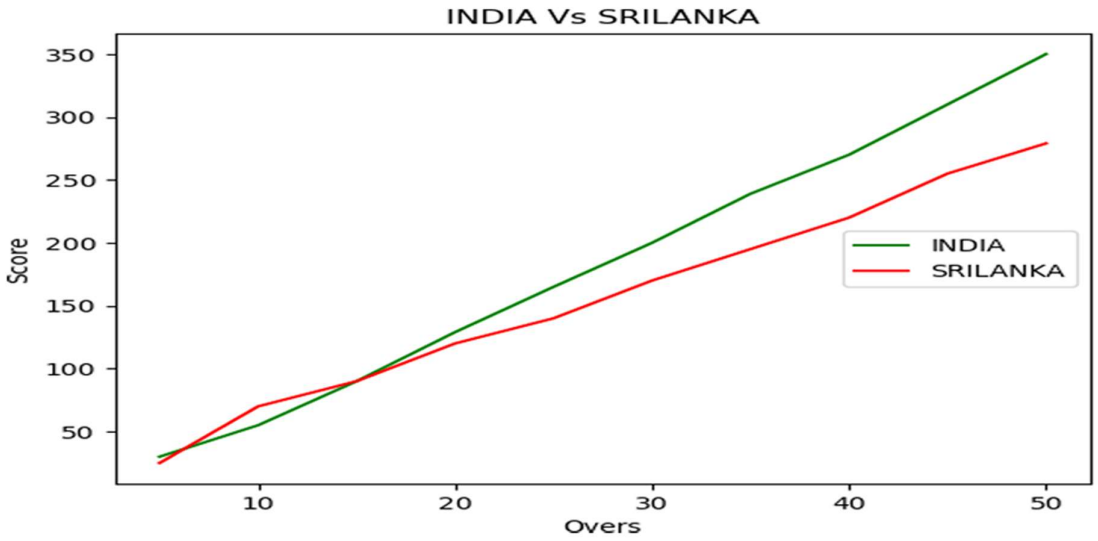

cricket.title("INDIA Vs SRILANKA")

cricket.xlabel("Overs")

cricket.ylabel("Score")

cricket.legend()
cricket.plot(Overs,Indian_Score,color="green",label="INDIA")
cricket.plot(Overs,Srilankan_Score,color="red",label="SRILANKA")
cricket.legend(loc="center right")
```

Output:

Result:

Hence, the experiment to show data visualization using line plot

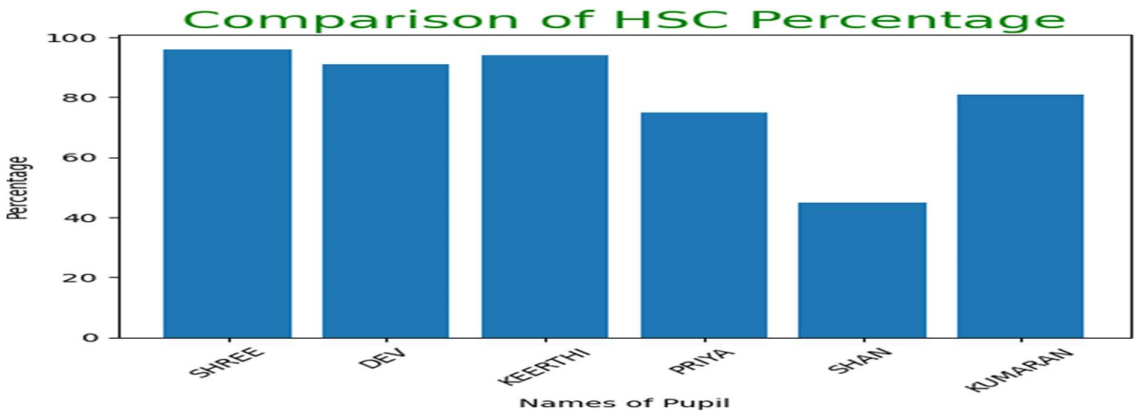

Was analysed and executed successfully.

Exp No:13.b Conduct an experiment to show data visualization using bar chart

Code:

```
import matplotlib.pyplot as hscmark
import numpy as np
 Names = ['SHREE', 'DEV', 'KEERTHI', 'PRIYA', 'SHAN', 'KUMARAN']
xaxis = np.arange(len(Names))
Percentage_hsc = [96, 91, 94, 75, 45, 81]
hscmark.bar(Names, Percentage_hsc)
hscmark.xticks(xaxis, Names, rotation=45)
hscmark.xlabel("Names of Pupil")
hscmark.ylabel("Percentage")
hscmark.title("Comparison of HSC Percentage", fontsize=20, color="green")
 hscmark.show().
```

Output:

Result:

Hence , experiment to show data visualization using bar chart

Was analysed and executed successfully.

Exp No:13.c Conduct an experiment to show data visualization using pie chart.

Code:

```
import matplotlib.pyplot as election

labels = ['CANDIDATE 1', 'CANDIDATE 2', 'CANDIDATE 3', 'CANDIDATE 4']

Votes = [315, 130, 245, 210]

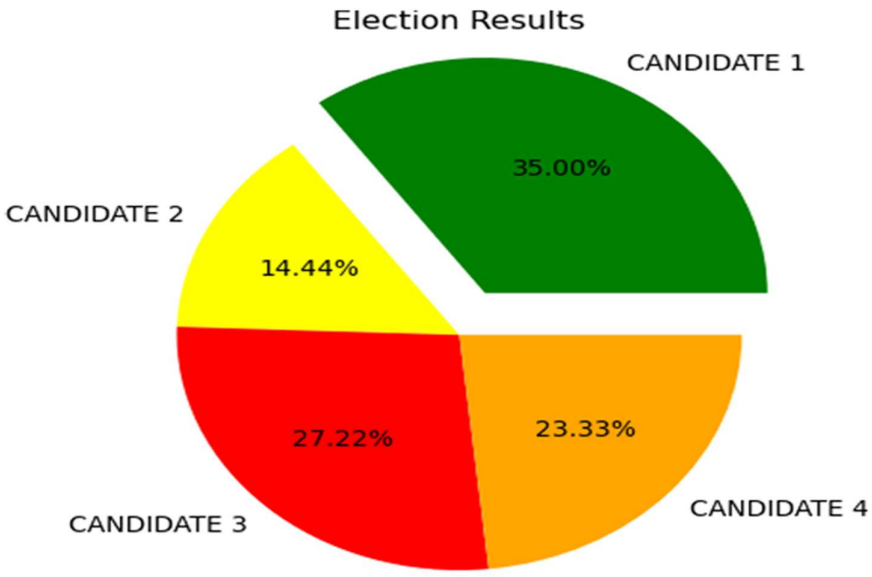

colors = ['green', 'yellow', 'red', 'orange']

explode = (0.2, 0, 0, 0) election.pie(Votes, lab

els=(labels, colors=colors, explode=explode, autopct='%0.2f%%') election.title('Election Results')

 election.show()
```

Output:

Result:

Hence , the experiment to show data visualization using pie chart was analysed and executed successfully.
